3 factors to consider when choosing the perfect rollator

1

SIZE AND ADJUSTABILITY

Standard height and bariatric weight capacity rollators should be selected based on a user's height and weight requirements as well as the ease of adjusting the handlebars and leg height for personal customization.

2

STYLE AND COMFORT

Padded seats, backrests, convenient carry baskets and pouches come standard on most rollators. Choose the comfort features on a rollator that best suit your lifestyle.

3

SAFETY AND TRAVEL

The ease of folding capability and the weight of the rollator can play a major part in the life of the rollator user. An active user that does not have to rely on a caregiver may want a lightweight rollator that can be lifted easily for frequent use.

McKesson Steel Transport Chair

- Weighs 26 lbs.
- Attractive silver vein finish
- 19" seat width
- Back folds down for storage and patient transport

Select canes with the perfect fit.

KNOW THE BASICS

STANDARD CANES

Traditional style-based canes are lightweight and available in a wide range of handles with various features to serve a user in need of less assistance or more portability.

QUAD CANES

Built with 3 or 4 short legs at the base to maximize cane support and allow stand-alone capabilities for added convenience.

Small-Base Quad Canes have a smaller base, but give more support than a standard cane. Generally, a small-base quad cane fits on an average depth stair.

Large-Base Quad Canes provide a larger base and more support.

CANE HANDLES

T-shaped handles are designed to provide secure grip and better distribute weight over the cane with a distinguished look.

Round handles are designed with traditional style of a crook handle and smaller than alternative standard canes to accommodate small hands.

Offset handles are ergonomically-designed with comfort grip to reduce hand pressure allowing for increased stability and comfort.

CHECK THE FIT

The cane handle should be at the same level as the person's wrist when they are standing and their arm is at their side.

MEASURE THE HEIGHT

Cane user should:

- Wear regular, everyday shoes
- Stand by a wall or chair for support
- Put the hand they will use the cane with by their side. *User may need attendant to assist for support depending on user balance.*

Measure from the ground to the crease of their wrist. This should be the handle height of the cane.

Check user's elbow bend with the cane in-hand, to verify a comfortable angle of about 15 degrees. *Bend may be greater if using primarily for balance.*

Note: the suggested steps should be used as a starting point as some users may want the handle higher or lower based on personal preference (usually within 1" of suggested).

McKesson patient handling products provide the quality and security needed to safely transfer and monitor your patients and residents.

McKesson Floor Mat Alarm Sensor Pad

- 1 year warranty
- Floor Mat Sensor Pad alerts caregiver of resident's activities by triggering a fall monitor when resident steps onto floor mat sensor pad
- Alarm will signal with as little as 1-1/2 lbs. pressure
- Can be used at bedside or in doorways
- Not made with natural rubber latex

MFR #	DESCRIPTION	QTY
162-1140	Floor Mat Alarm Sensor Pad	8/cs

McKesson Alarm Chair Sensor Pads

- Chair Sensor Pads are compatible with McKesson Fall Prevention Monitor
- Made with silver membrane technology, assures long reliable life
- Vinyl material is water resistant; provides protection against incontinence
- These weight-sensitive sensor pads are for chair fall alarm monitor use
- When connected to a fall prevention monitor, the sensor pad will trigger the fall alarm when weight is removed from the sensor pad itself
- Provides incontinence protection
- Made from an Anti-microbial material
- Not made with natural rubber latex

MFR #	DESCRIPTION	QTY
162-1129	10" x 15", 45 Day Warranty	50/cs
162-1136	10" x 15", 90 Day Warranty	50/cs
162-1137	10" x 15", 1 Year Warranty	50/cs

McKesson Alarm Bed Sensor Pads

- Bed Alarm Sensor Pads are placed under the resident on the bed
- When resident gets up and pressure is released from the pad the bed alarm monitor will sound (Monitor Required)
- Safety: Reduces tripping, entanglement and choking hazards
- Made with silver membrane technology, assures long reliable life
- Vinyl material is water resistant; provides protection against incontinence
- Made from an Anti-microbial material
- Not made with natural rubber latex

McKesson Premium Gel Cushions

- Helps in prevention, treatment and management of pressure sores with enhanced pressure redistribution
- Premium, 3" design includes a pressure-sensitive, molded high density polyurethane foam encompassing a gel bladder and topped with a gel-infused, visco memory foam layer
- Low-shear, stretch nylon cover allows air to pass, but resists fluids
- Low-maintenance, waterproof material unzips for convenient machine washing
- Specifically designed to optimize pressure relief and shock absorbancy by allowing user's pressure points to "immerse" into the gel-infused, visco-foam top layer
- Open-cell, visco memory foam for breathability while gel acts as cooling agent for temperature control and mitigating perspiration
- Trochanter cutouts facilitate proper pressure redistribution promoting stable pelvic support and posture
- Molded leg troughs promote thigh alignment and postural symmetry
- Raised front ridge to promote proper positioning and control sliding
- Adjustable straps buckle to secure appropriate position and safety
- 275 lbs. weight capacity
- Not made with natural rubber latex
