

# Cardiovascular Quality Measures: *Resources and tools to help close care gaps*

About 1 in 3 U.S. adults have high blood pressure <sup>1</sup>. Having the right tools and resources plays a key role in providing the best care, protecting your reimbursement and meeting your value-based care quality measures.

## Here are the cardiovascular measures you need to know.

- Cardiac Stress Imaging
- Atrial Fibrillation/Flutter
- Coronary Artery Disease
- Blood Pressure (BP) control
- Heart Failure
- Ischemic Vascular Disease
- Diabetic Assessment and Control
- Statin Therapy
- BMI Screening and follow-up
- Tobacco Screening
- Alcohol Screening

**Pick those that align with your patient population and those you can be successful capturing and reporting.**

## Support for reporting and care management

- **Better Reporting – Looking for a way to better evaluate and refine your quality measure performance?**  
McKesson has teamed up with athenahealth and Healthmonix to help evaluate your performance methods in comparison to your peers and recommend measures to help improve your score.
- **Automated Data Capture – Tired of manually inputting data into your EMR?**  
With RelayMed, you can automatically consolidate and upload your lab results to your EMR.
- **Patient Compliance – Need help managing patient care plans?**  
Chronic Care Management services from Wellbox can help carry the load, improve patient outcomes and reimbursement.
