

The Drug Supply Chain Security Act and McKesson Medical-Surgical

Under the DSCSA, all pharmaceuticals sold will be required to include a serial number, however, manufacturers have elected not to put serial numbers on individual vials or low unit of measure pharmaceuticals. Manufacturers will instead be serializing boxes and cases of pharmaceuticals.

As of November 2019, McKesson Medical-Surgical was no longer able to open packages of pharmaceuticals to break them down for low unit of measure sale (vials and eaches), since these individual items will not include a serial number.

Instead, McKesson is working with repackagers who will break down and repackage pharmaceuticals by the each or vial, placing a serial number on them to maintain compliance with the DSCSA and to continue meeting your pharmaceutical needs.

How does this repackaging process impact me?

Due to the increased expense related to repackaging, relabeling, handling and transportation, you may see an increase in price for pharmaceuticals sold by the vial or each.

How will I receive my order?

Low unit of measure pharmaceuticals are available either stocked directly in your local network or your item will be drop-shipped. Stocked items ship at no additional cost to you. HealthFirst drop-shipped items will have a \$5 (non-refrigerated) or \$5 (refrigerated) fee.

Please see the listing provided below that shows which serialized items are available in the low unit of measure sale and if they are stocked or available as a drop ship item.

For questions, please contact your McKesson Medical-Surgical Account Manager.

Pharmaceutical products available by low unit of measure
